## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 17-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sulc et al., U.S. Patent No. 5,270,415 (hereinafter "Sulc"). Sulc teaches a water swellable cross-

Art Unit: 1713

linked polymer of essentially balanced charge is obtained by polymerizing a polymer-forming composition comprising a cationic-anionic pair of ethylenically unsaturated monomers and a nonionic ethylenically unsaturated hydrophilic and/or hydrophobic monomer. See Sulc, Abstract; col. 2, line 12 through col. 4, line 21. The foregoing monomer mixture can also contain a cross-linking monomer containing at least two ethylenic sites. See Sulc, col. 4, lines 22-47. The present invention differs from Sulc in the following respect: Sulc does not explicitly disclose every species limitation found in the claimed invention.

4. The basic requirements of prima facie case of obvious are: (1) there must be some suggestion or motivation, either in the reference themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings; (2) there must be a reasonable expectation of success; (3) the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP 2143. "There are three possible sources for a motivation to combine references: the nature of the problem to be solved, the teachings of the prior art, and the

knowledge of persons of ordinary skill in the art." See In re Rouffet, 149 F.3d 1350, 1357, 47 USPQ2d 1453, 1457-58 (Fed. Cir. 1998). Although Sulc does not disclose all the species limitations, based on the specification as a whole a polymer chemist of ordinary skill in the art would be motivated to modify Sulc by using the generic disclosure to prepare contact lens material found in the claimed invention. Such modification would be obvious because one would have reasonable expectation of success that the nonionic monomer, cationic-anionic monomer and cross-linking monomer as taught by Sulc would be similarly useful and applicable the lens material taught in the present claims. Therefore, claims 17-54 are deemed as being unpatentable over Sulc.
